PROJECTS

AI Virtual Assistant Website

Full Stack AI Project

Jan 2026 – May 2026

- Engineered an AI-powered web application that delivers contextual responses through OpenAI API integration.
- Developed a responsive chat interface using HTML, CSS, and JavaScript to enhance user interaction.
- Implemented authentication and session management while incorporating NLP concepts to improve response quality.

Student Management System

Java Project

Developing

- Built a Java application for managing student records using Object-Oriented Programming principles.
- Implemented create, update, search, and delete functionalities for efficient record handling.
- Utilized Collections Framework and exception handling to improve reliability and performance.

A Multi-objective Evolutionary Approach

Cloud and Edge Computing Project

Dec 2025 – Apr 2026

- Formulated an optimization model for task scheduling across cloud and edge environments.
- Reduced processing latency through effective resource allocation strategies.
- Assessed scalability and computational efficiency under varying workloads.

INTERNSHIPS

Infosys Springboard Virtual Internship 6.0

Full Stack Developer Intern

Remote

Dec 2025 – Mar 2026

- Project: Trade Finance Blockchain Explorer**
- Developed a full-stack platform using React.js, FastAPI, and PostgreSQL for trade document verification and management.
- Integrated JWT authentication, SHA-256 hashing, and RESTful APIs while performing testing and debugging to improve reliability.
